HOLD 'N FOLD® CONTAINERS

The collapsible steel container with the load strength and durability of heavy-duty rigid containers.

Save valuable floor space. With Steel King's® patented Hold 'n Fold design you can store or stage ready for use on your production floor, three containers in the same space as one rigid container. Simply lift sides into position (they automatically lock in place) and it's ready to fill. Use Hold 'n Fold for intra-plant shipments and save shipping costs returning empty containers. Hold 'n Fold self-locks when folded, eliminating the need for banding.

- Collapsible – generates a 3:1 space savings
- Rugged 4,000 lb. capacity standard – larger load capacities available
- Patented mechanism – only Hold 'n Fold operates this easily
- Tubular construction – increases container's rigidity and durability
- Stackable – up to six high, even when each is loaded to full capacity
- Optional drop gates simplify positioning for loading and unloading
- Choose from a variety of standard colors – complement company graphics or color code containers to a specific department, product, operation or plant

Since 1970, Steel King industrial containers have set the standard for design and durability. Many standard and custom styles available, all with unique advantages that make all Steel King containers more convenient to use and longer lasting.

Available with corrugated steel or wire mesh sides.

IN STOCK | Ships within 48 hours.

Choose the sidewall best for containing your products—wire mesh or solid corrugated steel. Load capacity 4,000 lbs. Stocked in Vista Green.

| SIZE | DESCRIPTION | WEIGHT |
|-----------------|-------------------------|----------|
| 45" x 48" x 42" | Wire Mesh Hold 'n Fold | 321 lbs. |
| 45" x 48" x 42" | Corrugated Hold 'n Fold | 436 lbs. |

CUSTOM CONTAINERS | Optimize material handling operations with Steel King Hold 'n Fold containers designed specifically for your application. You can specify:

- Base size (length and width)
- Side height (within a range that allows proper folding)
- Decking material – wire mesh, sheet metal, expanded metal or wood
- Side material – open, wire mesh, corrugated steel, expanded metal or combinations
- Load capacity
- Optional drop gates – up to all four sides
- Optional skid bars
- Optional fork stirrups or fork tubes
- A variety of standard colors available

WORKINGTAINER®

A double-duty container that reduces material handling costs by providing heavy-duty storage and, at the same time, serving as a parts dispenser.

Double your space utilization by turning work areas into storage. Now, instead of storing parts in one area and then moving small quantities to work stations as you need them, you can store them right where they will be used—with Steel King WorkingTainers. Simply open the container door to the working tray position and you have easy access to parts.

- Ergonomic design improves productivity and reduces repetitive-stress injuries
- Wide, adjustable side door opens to tray position—facilitating product flow and eliminating having to reach over the top for materials
- Rugged 4,000 lb. capacity standard—larger capacities available
- Stackable up to six high while fully loaded
- Tubular construction—increases container's rigidity and durability

Add an optional Tilt & Store stand for enhanced product-flow dispensing.

IN STOCK | Ships within 48 hours

Four convenient sizes. Standard units include one door on narrow side of container. Load capacity 4,000 lbs. Stocked in Vista Green.

| W | L | H | ID | WEIGHT |
|-----|-----|-------|-----|----------|
| 30" | 36" | 30.5" | 24" | 164 lbs. |
| 32" | 40" | 30.5" | 24" | 182 lbs. |
| 36" | 44" | 30.5" | 24" | 203 lbs. |
| 40" | 48" | 30.5" | 24" | 224 lbs. |

CUSTOM CONTAINERS | Optimize material handling operations with custom WorkingTainers designed specifically for your operation. You can specify:

- Base size (*length and width*)
- Side height
- Side material—corrugated steel or expanded metal
- Decking material—sheet metal, expanded metal or wood
- Load capacity
- Optional internal dividers—compartmentalizing the container for multiple materials
- Optional stands—Tilt & Store or Portable Tilt for enhanced ergonomic dispensing
- A variety of standard colors available

Steel King Round Corner Corrugated Containers offer exceptional storage value not only because of their economical price, but also because their superior durability means lower lifetime cost.

IN STOCK | Ships within 48 hours

Two standard sizes. Load capacity 4,000 lbs.
Stocked in Vista Green.

| SIZE | WEIGHT |
|------------------------------|----------|
| 33.5" x 41.5" x 28.5" – Ext. | 205 lbs. |
| 32.0" x 40.0" x 24.0" – Int. | |
| 41.5" x 49.5" x 28.5" – Ext. | 258 lbs. |
| 40.0" x 48.0" x 24.0" – Int. | |

CUSTOM CONTAINERS | A Steel King Round Corner Corrugated Container is exactly what you want, but you need a nonstandard size or feature? Order a custom container and specify:

- Base size (length and width)
- Inside useable height up to 36" in 3" increments
- Base design—standard or reinforced corrugated steel to meet capacity requirements
- Load capacity
- Stacking leg design
- Available options:
 - Fork stirrups
 - Crane eyes/hooks
 - Roll-over runners
 - Venting holes
 - Bar grate decking
- A variety of standard colors available

ROUND CORNER CORRUGATED CONTAINERS

The best low-cost, yet durable bulk container on the market.

The answer for low-cost bulk parts storage. Heavy-gauge corrugated steel sides and deck make Steel King's Round Corner Corrugated Containers a rugged general-purpose bin suitable for a broad range of parts and materials.

- Rugged 4,000 lb. capacity standard – larger load capacities available
- Universal stacking legs – provides easy stackability up to four high, even when fully loaded to capacity
- Easy-to-clean round corners eliminate dirt build up. Rounded edges minimize snags and sharp-edge impact damage

HEAVY-DUTY RIGID CONTAINERS

The workhorse of industrial containers, Steel King Heavy-Duty Rigid Containers are designed to meet your specific requirements.

Built tough for longer life and to your specifications. Utilizing super-strong tubular-frame construction, Steel King Heavy-Duty Rigid Containers are made to stand up to rugged everyday use. These containers are custom designed to your requirements and can be made in virtually any size.

- Standard units up to 6,000 lb. capacity – larger load capacities available
- Most stackable up to six high while fully loaded

Heavy-Duty Rigid Containers are available in a wide variety of sizes and features to meet the specific needs of your applications.

CUSTOM CONTAINERS | Get containers with the features ideal for your operations. You can specify:

- Base size (*length and width*)
- Side height
- Side material – flat or corrugated steel, wire mesh, expanded metal or combinations
- Base material – flat or corrugated steel, wire mesh, expanded metal or bar grating
- Load capacity
- Available options:
 - Drop gates
 - Skid bars
 - Fork stirrups
 - Crane eyes/hooks
 - Roll-over runners
 - Casters
 - Galvanizing
- A variety of standard colors available

SPECIALTY CONTAINERS

No matter what the environment or application, Steel King will manufacture a container to fit your needs.

Drop Bottom Containers – a hinged deck makes it easy to unload castings and other heavy or hot materials. The heavy-duty hinge design works easily under any conditions, while a special latch mechanism prevents parts from discharging before the container is properly positioned over the work stand. Add to that:

- 4,000 lb. and 6,000 lb. capacity
- Side ventilation holes to facilitate cooling of materials
- Bar grate decking – allows dirt and debris to fall through, keeping parts clean
- Stackable – up to four high when loaded
- Customizable by size, materials, load capacity or color

STAC-KING® PORTABLE RACKS

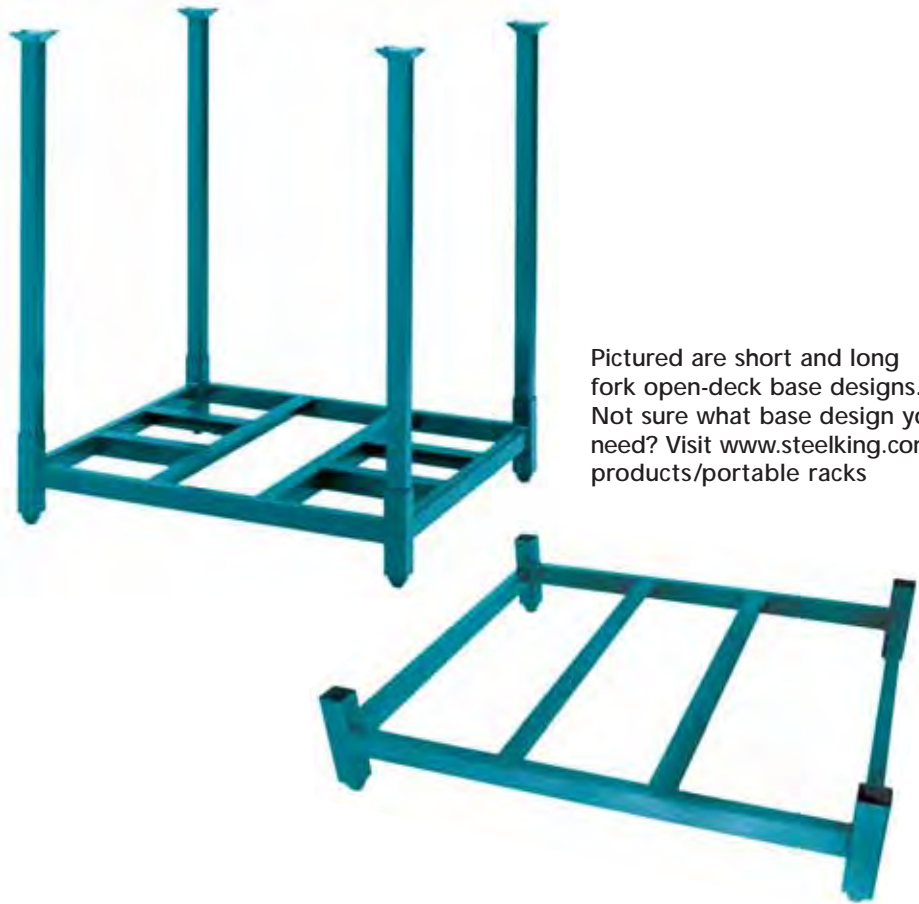

The convenient, economical alternative to standard pallet racks.

Reduce product damage, maximize storage density. Stac-King is the most flexible system on the market for handling, staging, shipping and storing palletizable materials. Ultra-strong tubular-steel corner posts allow loads to be stacked up to six units high without load-on-load contact –eliminating the product-crushing damage that occurs when traditional pallet loads are stacked on top of each other. As inventory levels fluctuate, simply remove the corner posts for high-density storage and shipping of empty racks. *(Traditional pallet rack systems use the same amount of space, whether full or empty.)*

- Eliminates ongoing costs of purchasing (*leasing*), repairing and disposing of wood pallets. *(Stac-King's tubular steel base acts as its own pallet.)*
- Standard 2,000 lb. or 4,000 lb. capacities – larger load capacities available
- Reduces product damage resulting from stacking and handling
- Allows safer utilization of overhead space
- Frees valuable floor space when not in use
- Makes changing rack layouts simple – no expensive dismantling or installation costs
- Custom-designed post targets facilitate easier and safer stacking

Steel King racks lead the industry in innovative design, strength, workmanship and service. From orders of one or two standard units to custom racks for entire warehouses, Steel King's expertise will enhance safety for your people and products, while optimizing both space utilization and your material handling operation.

Pictured are short and long fork open-deck base designs. Not sure what base design you need? Visit www.steelking.com/products/portable-racks

IN STOCK | Ships within 48 hours

You can have almost immediate delivery of Stac-King racks in six standard models, corresponding with customary industry pallet and fork length dimensions. Load capacity 4,000 lbs. Stocked in Vista Green.

| SIZE | DESCRIPTION | WEIGHT |
|-----------|---------------------|---------|
| 42" x 48" | Base – open | 83 lbs. |
| 42" x 48" | Base with wood deck | 87 lbs. |
| 42" x 60" | Base – open | 92 lbs. |
| 42" x 60" | Base with wood deck | 98 lbs. |
| 48" x 48" | Base – open | 89 lbs. |
| 48" x 48" | Base with wood deck | 94 lbs. |
| 36" | Corner-posts | 9 lbs. |
| 48" | Corner-posts | 12 lbs. |

Stac-King's base deck options provide excellent alternatives for various industry applications.

CUSTOM PORTABLE RACKS | Stac-King racks can also be customized to accommodate virtually any application you want. Customizable specifications include:

- Base size (*length and width*)
- Base type – short fork, long fork, or filled in; two-way or four-way entry
- Decking – open, plywood, wood board, sheet metal, expanded metal or wire mesh
- Socket height – add a deeper socket for increased stability
- Corner-post height
- Plug size and type
- Target size and type
- Load capacity
- Available options:
 - Fork stirrups
 - Skid bars
 - Side or end frames in lieu of corner posts
 - Caster plates
 - Enclosure collars
 - Automotive-style corner posts
 - Galvanizing
- A variety of standard colors available

SPECIALTY RACKS

Whatever the shape, weight or storage challenge – Steel King can design a rack that saves you time, protects your materials and improves your operations.

Coil and Roll Racks – Achieve efficient, low-cost handling of any cylindrical product with Steel King's Coil and Roll Racks. Applications include plastic films, paper and various metals such as steel and wire coils.

- Standard capacities up to 6,000 lbs., larger 10 to 15 ton capacity racks available

Pin Racks – No matter what odd-shape part you want to store, Steel King's Pin Rack adjusts easily to secure it in place. The Pin Racks use a perforated double-steel deck that works much like a peg-board.

- Standard units 40" x 40" x 12" usable height and 18.5" overall height – stack up to eight high while fully loaded
- Load capacity up to 4,000 lbs., larger capacities available

Bar Racks – Handle and store up to 20,000 lbs. of pipe or bars per unit with Steel King's Bar Racks. Designed to be easily handled with overhead cranes and your choice of "Grab" fitting.

- Customized to your product need
- Stackable to increase storage flexibility

Steel King's Specialty Racks are exactly what the name implies – Special. Racks are custom designed and built to your specifications. You choose the base design, size, load capacity, color and fork lift accessories such as stirrups or floor runners.

Bag racks for oddly shaped, delicate or fragile parts. Bags separate and protect parts from surface damage. Ideal for parts with highly polished finishes, such as mirrors or trim panels.

Rigid, collapsible, multi-level or adjustable. Steel King will alter the size, dunnage, weight, capacity and construction materials to make a shipping rack that fits your product.

Equipment and implement racks for lawn mowers, back hoes, augers, outboard engines and generators.

Steel King has extensive experience designing shipping racks for vehicle parts and accessories, including Class A Exterior parts such as windows, bumpers, fenders, fascia, mirrors and body side panels.

Class A Interior parts such as door and body side panels, steering wheels, instrument panels, dashboards, seats and headliners.

Power train, cooling and exhaust systems components, such as engines, transmissions, axles, radiators, hard lines and mufflers.

CUSTOM SHIPPING SOLUTIONS

Save freight costs. Reduce product damage. Minimize packing costs.

The missing link in advanced material-handling systems. If you ship components between plants, or a steady stream of uniform products to contract customers – Steel King custom-designed, returnable shipping racks will save you money in five ways:

- 1. Save on shipping and inventory costs:** Custom designed specifically for your product, Steel King shipping racks maximize space utilization, whether in a truck, railcar or warehouse.
- 2. Save on labor costs:** Steel King shipping racks are designed to load and unload efficiently as well as improve productivity during handling and transport.
- 3. Save on product damage costs:** Steel King shipping racks are custom designed to hold your product securely and protect it from damage – even fragile products like glass.
- 4. Save on packaging costs:** Steel King shipping racks eliminate the need for elaborate protective packaging, including costs of disposing used packaging materials.
- 5. Save capital equipment:** Steel King shipping racks can double as stackable storage racks, reducing the need for warehouse racking.

Steel King offers complete design services for custom shipping racks, including AutoCAD drafting, rack prototypes and testing. Often we can design a custom rack with no more than a prototype or drawing of the part you need shipped.

Other Steel King Products

Steel King specializes in the design and production of a variety of fabricated steel storage products. Recognized as the industry leader, we offer proven expertise in solving unique storage problems through innovation and quality.

In addition to a complete line of containers and portable racks, Steel King offers a comprehensive selection of pallet racks, cantilever racks, steel guard railings and dynamic storage systems.

For information on any of these quality products, or for ideas for solving your unique shipping problem, call Steel King today.
