

DESIGNED TO PERFORM

Built to Deliver

For over 50 years, Steel King Industries, Inc. has produced **high-caliber** material handling **racking, storage, and safety systems** that improve, fortify, and protect company's supply chains nationwide. With unparalleled standards of safety and quality, we manufacture storage solutions ranging from the industry's top containers, work platforms, and rack systems, to **highly engineered** distribution facility systems that are foundational for an automated supply chain. Steel King's reliability, strength, and support have earned recognition and loyalty as one of the top rack manufacturers in North America, as we proudly contribute vitality, efficiency, and value to supply chains worldwide.

Unique Strengths

Steel King embodies innovation and integrity like no other.
What makes our systems and our business model outlast the rest?

✓ U.S. Skill

It starts with our people; quality people are the real difference maker for Steel King. Our designers, engineers, and fabricators are seasoned and superior. Our welders are trained and qualified to American Welding Society (AWS) D1.1 and D1.3 standards with in-house Certified Welding Inspectors (CWI), combined with ultramodern robotic welding technology. Together, our teams of experts have designed thousands of unique storage systems to meet every need imaginable.

✓ U.S. Steel

Quite simply, there's nothing stronger than high-quality U.S. steel. Steel King starts with 100% American-forged steel as the basis for creating durable, long-lasting, engineered solutions with aesthetically pleasing, environmentally-safe powder coat technology.

✓ U.S. Safety

Steel King is committed to leading the industry in quality and safety. Our dedication to proper training is unparalleled. And with Project Engineers licensed in over 30 states, our facilities and processes are rigorously tested for safety and durability.
