Steel Safety Products
Guard Rail & Accessories

BUILT FOR SAFETY
Designed for Versatility
Steel King is committed to making workplaces safer. Our current products set the industry standard, and we continue to develop new products and technologies that advance the standards of facility safety. We pledge to continue this important innovative spirit with a determination as solid as steel.

Reduce the costs and risks of:

- Worker compensation claims
- Inventory losses
- Equipment damage
- Building damage
- Lost production time

Protect valuable and fragile equipment:

- Worker areas
- Aisleways
- Mezzanines
- In-plant offices
- Building walls
- Rack aisle ends
- Conveyors
- Inventory areas
- Pedestrian aisles
- Loading docks
- Electrical panels
- HVAC equipment
- Freezer / cooler panels
- Controls and computer consoles
- Many more…

Steel King protective guard rail...

Built better to protect better

Industrial lift truck accidents are a common and costly occurrence.

OSHA estimates that there are 680,400 accidents each year involving powered industrial trucks. Approximately 90,000 workers suffer some type of injuries in these accidents, resulting in lost work time, workers’ compensation claims, and productivity losses – not to mention the damage inflicted upon equipment and facilities. About 100 people lose their lives each year in these accidents¹.

Steel King’s protective products provide a cost effective barrier against the effects of such accidents.

Steel Guard®

A smart investment in plant safety

Protecting your people, product, and physical plant from collisions is one of the best investments you can make.

In 1986, we set out to design the toughest guard rail system in the industry. After more than 40,000 installations, no other brand exceeds the rugged design of Steel Guard – tested and proven at 13,440 lbs. impact force.

Now that’s one tough rail!

“Steel Guard unit tested: 42” tall unit with two levels of three-ribbed rails.

48 HOUR QUICK SHIP

Steel King’s exclusive Quick Ship program makes ordering quick and painless. Steel King, utilizing its national purchasing power, has negotiated favorable LTL rates from both our Wisconsin and Georgia facilities. One phone call takes care of your entire order and freight, saving you time and money.

Other Quick Ship products include rack uprights, beams, industrial containers and shipping racks.
Armor Guard®

Armor Guard industrial safety railing is the perfect safety solution for separating your people areas – work stations and walkways – from light shop traffic.

Steel King’s Armor Guard provides economical protection against accidents.

• Medium-duty industrial railing – perfect for separating people from traffic areas
• Modular design makes expansion or relocation easy
• Universal posts feature connection holes on three sides allowing you to create barriers for your unique needs

Optional lift-out / drop-in rail system

An optional lift-out / drop-in rail system provides accessibility and protection. Available for both Steel Guard and Armor Guard.

1. Choose height
   • Single-high or double-high for Steel Guard
   • Single-high or triple-high for Armor Guard

2. Choose post type

3. Choose rail lengths
   Note: Rails are measured from post-to-post, on center; actual rail component will be 4” shorter than the specified length on Steel Guard, and 3” for Armor Guard. Lift-out pockets increase center-to-center dimension by 1”.

4. Choose bolted or lift-out rail

5. Choose configuration
   • Straight
   • Optional side-angled
   • Vertically-angled

Base Plate Cover

Clam shell style base plates for Steel Guard 4”x 4” posts install easily, even on existing guard rail installations.

- Hides anchor bolts for a more aesthetic look
- Protects forklift tires from damage caused by contact with anchors
- Covers entire base plate
- Secured together by two drive rivets
- Dimensions (assembled): 10-15/32” x 10-15/32” x 2-3/8”

How to design guard rail systems

</tr>
<tr>
<td>Post tube drilled on two adjacent sides, post welded in center of base plate. Used to make a 90-degree bend in a run of railing.</td>
</tr>
<tr>
<td><strong>Center Post – Side Offset</strong></td>
</tr>
<tr>
<td>Post tube drilled on two opposite sides, post welded on side of plate, hole shifted to side. Usually used as an in-line post where flush design is desired.</td>
</tr>
<tr>
<td><strong>Center Post – Standard Offset</strong></td>
</tr>
<tr>
<td>Post tube drilled on two adjacent sides, post welded in corner of base plate. Used to make a 90-degree bend in a run of railing, with rail flush to outside of base plate or end-of-run flush.</td>
</tr>
</tbody>
</table>

All posts shown are stock items.
Safety Gates

Steel King’s self-closing safety gate adds versatility to the Steel Guard and Armor Guard railing systems.

Manufactured to the same standards as the Steel Guard and Armor Guard railing, the gates can be ordered as part of a new installation or retrofitted into an existing system.

Steel King’s self-closing safety gates use heavy, 11-gauge corrugated steel rails and are designed to fit a 48” post-to-post center line within a protective railing system.

The gate is shipped with the hinge assembly on one side of the gate and two gate stops on the opposite side. Hardware is included, and the gates will bolt to the existing posts of the Steel Guard or Armor Guard protective railing system. The Safety Gates are easily installed without cutting, welding or drilling.

In addition, the Steel King Self-Closing Safety Gates come with a tough, durable, UV- and scratch-resistant yellow powder coat finish.

Changing the direction of the gate is as simple as removing a few bolts and flipping the gate in the direction needed. The gate opens to a 90-degree angle. Steel spring automatically closes gate after passage is complete.

Custom sizes and other colors available.

Mega Guard®

Steel King’s Mega Guard system is designed for quick and simple protection at ends of rack rows or adjacent to equipment. Tubes are angled to deflect impacts and maximize strength. Completely welded, one-piece design for quick assembly.

Base plates are 10” x 10” steel plate, pre-punched for four 3/4” diameter anchor bolts. Tubes are 4” square x 1/4”-wall structural steel. All joints are fully welded. Horizontal tubes are welded “point-up” for better sanitation.

### Table: Bollards vs. Mega Guards

</tbody>
</table>

Mega Guard’s angled tubes are designed to deflect impact and maximize strength.

Heavy-duty safety bollards are also available to guard fragile areas and corner locations throughout your manufacturing and industrial traffic areas.
Guard Dawg®
Steel King’s Guard Dawg system is an inexpensive low profile method to protect racks at intersections and along high traffic routes. Steel King’s Guard Dawg can be ordered in any custom size needed.

- 5” x 3” x 3/8” angle
- 46” right or left guards in stock
- Double-ended guards available
- Protects 3” or 4” wide, 42” deep uprights with standard footplates
- Anchors and hardware included

Column Core®
Forklift damage is the leading factor in about 90% of rack failures. Column Core strengthens SK2000® rack uprights and is exclusively available as a component to Steel King’s SK2000 tubular racks, the benchmark system in the rack market. Column Core’s unique C-shaped column reinforcement improves on SK2000 rack that’s already two-and-a-half times more impact-resistant than comparable open-back racks. With Column Core, your SK2000 rack is five times more impact resistant at the front corners and side – where the upright is most vulnerable.

- Retain full beam adjustability
- Reduce puncturing, buckling and torsional twisting
- Reinforce only as high as needed

Free-Standing Column Protectors
Steel King’s Free-Standing Column Protectors shield rack columns from collision damage by blocking and deflecting fork trucks at the point of impact.

- Easy after-market add-on
- Standard heights: 12”, 18”, 24”
- Highly visible, safety yellow
- Protects 3” or 4” wide columns with standard base plates
- Requires four 1/2” X 3-3/4” anchors

Snap-Guard® Column Protectors
Steel King’s Snap-Guard is an adjustable column protector for boltless rack that protects SK2000 upright rack column from forklift damage. Snap-Guard is constructed of structural angle and features an exclusive four-rivet connection that automatically locks into the upright column. Adjustable, removable and flexible, the Snap-Guard can be used to protect each storage level. A great after-market addition to any pallet rack installation, Snap-Guard is available immediately through Steel King’s Quick Ship program.

- Easy after-market add-on
- Four-rivet snap-on connection
- Auto-engaging safety lock
- Adjustable in 2” increments
- Remove and adjust tool available
Why Choose Steel King?

**Industry Leadership** – With our state-of-the-art facilities and active participation in the associations that develop the national specifications for quality and safety, we lead the way with our uncompromising dedication to engineering and manufacturing excellence.

**Expertise and Versatility** – Our in-house engineering and drafting staff has decades of experience designing thousands of storage systems, which means we can custom engineer a solution for any storage challenge and ensure efficient space utilization.

**Quality and Safety** – Steel King is committed to providing customers with the highest quality and safest products possible. Our structural engineers design our products to strictly conform to industry design codes, and our rack system capacity charts are RMI-certified to ensure product and worker safety. Steel King facilities and processes are tested and fabricator licenses are approved for the City of Los Angeles and the City of Phoenix.

**Durability** – Made with the highest quality materials available, Steel King products are built to last. We design them to better resist the daily rigors of your environment, which means they last longer, require less maintenance and provide greater safety.

**Single Source Responsibility** – Our wide breadth of product offerings allows us single-source responsibility that ensures both cost and quality control.

**Welder Certification** – Our welders are trained and qualified to American Welding Society (AWS) D1.1 and D1.3 standards. We also have an in-house Certified Welding Inspector (CWI).

**We are a “one-stop shop” for all your storage needs.**

Steel King has been delivering customized storage solutions since 1970, designing and manufacturing pallet racking systems and related material handling products that improve operational efficiency in manufacturing, warehousing and distribution facilities.

When it comes to offering the highest quality, safest and most diverse product offerings,

**Steel King is built to deliver.**
