

COLUMN CORE

BRACE YOURSELF AGAINST COSTLY RACK DAMAGE

The Column Core reinforcement shown in yellow for added emphasis and detail.

Column Core

Forklift damage is the core factor in about 90% of rack failures. Get to the heart of the solution with Column Core® by Steel King.

Column Core is exclusively available as a component to Steel King's SK2000 tubular racks - the benchmark system in the storage market. Column Core's unique C-shaped column reinforcement takes a rack that's already 2-1/2 times more impact resistant than open-back uprights and doubles it. With Column Core, your SK2000 rack is a full 5 times more impact resistant at the front corners and sides where the upright is most vulnerable.

Column Core is sold in standard heights from 6 to 96 inches, in 6-inch increments. Custom heights are available upon request. Column Core can be installed in one or both upright columns for maximum rack protection.

Column Core Advantages

- > Retain full beam adjustability
- > Reduce puncturing, buckling, and torsional twisting
- > Increase protection without additional installation costs
- > Reinforce only as high as needed

Steel King offers a wide variety of plant safety products.

Guard Dawg®

Steel King's Guard Dawg system is an inexpensive low profile method to protect racks at intersections and along high traffic routes.

Steel King's Guard Dawg can be ordered in any custom size needed.

- > 5" x 3" x 3/8" angle
- > 46" right or left guards in stock
- > Double-ended guards available
- > Protects 3" or 4" wide, 42" deep uprights with standard footplates
- > Anchors and hardware included

Right-hand guard shown

Free-Standing Column Protectors

Steel King's Free-Standing Column Protectors shield rack columns from collision damage by blocking and deflecting fork trucks at the point of impact.

- › Easy after-market add-on
- › Standard heights: 12", 18", 24"
- › Highly visible, safety yellow
- › Protects 3" or 4" wide columns with standard base plates
- › Requires four 1/2" X 3-3/4" anchors

Designed to protect both 3" and 4" wide columns/uprights, Steel King's Free-Standing Column Protectors come in.

Snap-Guard® Column Protectors

Steel King's Snap-Guard is an adjustable column protector for boltless rack that protects SK2000 upright rack column from forklift damage. Snap-Guard is constructed of structural angle and features an exclusive four-rivet connection that automatically locks into the upright column. Adjustable, removable and flexible, the Snap-Guard can be used to protect each storage level. A great after-market addition to any pallet rack installation, Snap-Guard is available immediately through Steel King's Quick Ship program.

- › Easy after-market add-on
- › Four-rivet snap-on connection
- › Auto-engaging safety lock
- › Adjustable in 2" increments
- › Remove and adjust tool available

Rack and Systems

The ultimate in design and execution, customized for your space and requirements. Built tough, forklift-friendly, and ready to store any inventory.

- > Pallet Racks
