

HOW STEEL KING'S SK ADVANTX™ STACKS UP

COMPARE BEFORE YOU BUY AND EXPERIENCE THE SK ADVANTX™ DIFFERENCE!

FEATURE	SK ADVANTX™	Competitor #1	Competitor #2	Competitor #3
All frame columns, frame bracing members, and beams are bolted together onsite	✓			
Only North American company manufacturing modular, bolted racking from US made structural steel	✓			
Structural bolted racking system where beams and bracing can be located at the same elevations	✓			
X-Braceable for improved seismic performance	✓			
55,000 PSI minimum yield steel	✓			
Powder coat finish with 5 standard and 8 premium color options	✓			
Special designs easily accommodated - conveyor windows, inclined roof trusses, splicing for taller heights, very deep upright designs, X-braced paneling, etc.	✓			
Replacement of damaged components easily replaced without any welding work	✓			
No welding of braces to posts means a shorter fabrication lead time	✓			
Easily reconfigurable compared to welded frames	✓			
RMI R-Mark Certified 	✓			
Detachable Yielding Baseplates for improved survivability	✓			
AWS qualified welders	✓			
Reduced shipping costs compared to welded frames	✓			
Licensed PEs on staff	✓			
Made in US, using US Steel	✓
